

Sr. Data Scientist -- Remote

Lenders around the world partner with Ensemblex to start, scale, and manage their credit businesses. Our client engagements are challenging, intellectually stimulating, and ambitious in scope. Typically, our projects deliver tens of millions of dollars of value to our clients' bottom lines.

We are looking for smart, driven data scientists who will make fundamental contributions to our ML modeling efforts, helping craft custom solutions optimized to our clients' needs. From the top down, Ensemblex values curiosity, creativity, collaboration, and, above all, rigor. Our culture is high competence and low ego -- you'll get a chance to thrive, grow with the company, and hopefully learn a lot along the way. Our team is distributed across the country, so you can work from home and save the commute. Infrequent travel is required, but the majority of your time will be spent solving our most complex problems.

Our ideal candidate has:

- 3+ years hands-on experience building high-quality machine learning models
- Extensive use of R and/or Python and related data science libraries
- Practical, in-depth knowledge of common gold-standard ML algorithms
- Relevant experience in related technologies such as databases, visualizations, production deployment, API integration, AWS
- Self-motivation, the ability to prioritize and deliver in a dynamic environment
- Previous experience in FinTech and/or consumer lending
- Graduate degree in a quantitative discipline

Opportunity and compensation:

- Competitive base plus bonus
- Opportunity for rapid advancement within a fantastic company culture
- Opportunity to acquire equity in Ensemblex and/or client companies
- Full health benefits and 401(k) match
- Unlimited PTO

Please contact jim@ensemblex.com, if interested.
